Working Location: CA - Pleasanton

Employment Status: Full Time – Regular

Required Experience: 5 years plus

Required Education: Associated Degree or equiv. Experience

Position Title: QC Inspector

Job Description:

The Quality Inspector position is responsible for identifying, evaluating, & developing the necessary quality and process improvements in all areas of machining and Inspection of suppliers. The candidate will provide Prototype and production support for IQC, OQC, Inspection documents and improve processes, work on corrective and preventative actions and create control plans as necessary.

- Work with Machine shop for Inspection to develop inspection strategies for all purchased sub-assemblies and participate in new product introduction.
- Support transition to a lean manufacturing environment consisting on supply chain pull systems and Six Sigma initiatives.
- Working with the procurement group, participate in the inspection of commodity specific material by establishing pass or rejection decisions, supply base supplier report cards and strategic supplier direction.
- Developing, implementing and maintaining operational sequences, procedure methods and processes in the manufacture of sub-assemblies and product.
- Ensuring compliance to ISO, QSR and other regulatory compliances which will include internal audits, process validations and product quality control.
- Resolve quality and process related issues internally and with suppliers
 - Conduct ISO-9001 system audits and supplier surveys
 - Participate in Gage R&R fixture/test methods and Tooling development
 - Generate quality plans, procedures and instructions as required
 - Knowledge of the RoHS Directive and experience in the selection of alternative RoHS and SEARCH.

Essential Skills:

Candidates must possess a Bachelor degree in an Inspection discipline or equivalent experience with 5 years experience. The Inspector will be a self-motivated team player who is able to work at all levels internally and externally with minimal supervision and has strong interpersonal, written and verbal communication skills.
