Welcome to the Fourté webpage!

Welcome to the Fourté webpage and sharing a view moments with us. My name is James Farquhar. I'm the general manager of the Fourté companies, Fourté Design and Development and Fourté International. Fourté is a global team of dedicated personnel providing mechanical solutions for your specific needs. We created engineered solutions and manufacturing in the areas of fiber optics, medical devices, and emerging markets with sale support in Europe, India, Israel, Japan, Malaysia, Taiwan, and the United States.

Let me explain a bit about Fourté Design and Development. Our fiber optics product line includes mechanical design, prototyping, cages, EMI shielding, and release mechanisms for transceiver housings for the following form factors: PON, QSFP, SFP, SFP+, and XFP. Fourté Design and Development provides the medical industry with custom engineering, prototyping, and production solutions to enhance your product developments.

Fourté International has a global team that will work with your engineers to save your company both time and money. Emerging markets, defined as business and market activity in emerging regions that are pre-exposed to technology based utilized product development with known science or technologies, have a markup potential for growth that outpaces developed regions and understands technology is a key component in the flat world. Fourté International has operations in India, Malaysia, Mexico, Singapore, and the United States.

**Racer
Technology**

I'm Willy Koh, managing director of Fourté International Singapore. FI Singapore is a joint venture between Fourté International and Racer Technology. We formed FI Singapore in 2007 to better service customers with engineering services and manufacturing capabilities that are both in Asia and the United States. This business unit is tasked to focus on molded plastics and value added services to enhance plastic products. Racer Technology was founded in 1988. We employ over 1,500 associates in 4 different countries and in 7 facilities throughout Asia.

I'd like to explain to you FI Singapore services. FI Singapore provides technically driven customer plastic components in areas of engineering, design for manufacturing, prototyping, tooling, and production. Our capabilities are as follows: product design, mold design, injection molding, structural foam, gas assist molding, insert and over mold. To ensure your success, following are the secondary operations. We have fully and semi-automated continuous product spray painting line for EMI coating and cosmetics products, ultrasonic welding, heat staking, silk screening, pad printing, cubic printing, thermal laboring, mechanical assembly, and packaging fulfillment.

I'd like to discuss with you a very important function of manufacturing. This will be quality of the joint venture of FI Singapore. We manufacture all our products in an ISO 9000 Certified environment. For medical devices, we have ISO 13485 and FDA Class 3. We also have 14000 Certified. At FI Singapore, we respect your intellectual property. We have been dealing with you as technology-based companies since our creation. Please rest assured that when you manufacture at FI Singapore, we protect your IP and interest.

It's been my pleasure to meet you. I'd like to extend our invitation to you to visit our facility in Asia. Please come and meet our dedicated team. FI Singapore is here to assist you in design, prototyping, tooling, and manufacturing of your plastic components.

Welcome to Japan!

N&J, Inc

I am Noriaki Hara, general manager of N&J Incorporated, located in the Tokyo area. N&J Incorporated is an electronic component distributor as well as importer of Fourté fiber optics and exporter of custom integrated circuits. Our customers include fiber optical module manufacturers and semi conductor equipment manufacturers.

Products provided include custom semi conductor solutions, fiber optical components, networking, and telecommunications. Services include component to mechanical design solution, distribution, R&D design, and technical support. We offer our customers local distribution, logistic services, and technical sales.

Call or send me an e-mail and it'll be my pleasure to assist you on your next design or project.

Welcome to Israel!

**Erantel
Electronics
Ltd**

I'm Guy Fishler, vice president of sales and marketing for Erantel Electronics LTD in Israel. Erantel Electronics is an ISO 9001:2000 certified representative organization serving the Israeli high tech industry. We're conveniently located in Kfar Saba. Our customers include industrial, military, and government.

Products provided include EMC solutions, fiber optic components, medical electronics, networking, telecommunications, testing instruments, and wireless communications. Services we offer include component to complete system solutions, distribution, laboratory services, R&D design, and technical support. We offer our customers local distribution, logistic services, and technical sales.

Call or send me an e-mail and it will be my pleasure to assist you on your next design or project.
